Portfolio: https://akofisher.github.io/my-portfolio/

PROFESSIONAL SUMMARY

Frontend and Mobile Developer with 4+ years of experience building production-ready web and mobile applications using ReactJS and React Native. Strong background in scalable app architecture, reusable components, real-time data handling with WebSockets, and implementing complex business logic such as scheduling and availability systems. Experienced with REST APIs, state management, form validation, and smooth UI animations. Focused on clean code, performance, and user-friendly interfaces.

TECHNICAL SKILLS

Frontend & Mobile: React Native, ReactJS, Functional Components, React Hooks, Responsive UI

State Management: Redux Toolkit, Redux Persist, Context API, MobX, Zustand

Networking & Real-Time: REST APIs, Axios, Fetch, WebSockets, real-time data streaming

Business Logic & UI: Time & date handling, scheduling systems, blocked date ranges, dynamic UI rules

Forms & Validation: Formik, Yup, custom input components, error handling UX

Animations & UX: Lottie (RN), Framer Motion (Web), smooth transitions

Styling: Tailwind CSS, CSS, SCSS, Material UI, Styled Components, Bootstrap

Tools: Git, GitHub, Android Studio, Xcode, Postman, npm, yarn

Familiar with: Node.js, Express.js, MongoDB, Mongoose, Python

PROFESSIONAL EXPERIENCE

ReactJS & React Native Developer — Multiple Projects (Remote, 2021 – Present)

• Built complete web and mobile applications from scratch to production using ReactJS and React Native.

• Designed scalable navigation architectures including authentication flows, stack, tab, and drawer navigators.

• Implemented real-time features using WebSockets, including crypto trade streaming and filtering.

• Developed advanced scheduling logic with weekday availability and blocked date ranges using Redux state.

• Created dynamic TimePicker components based on backend configuration rules.

• Implemented global state using Redux Toolkit, Redux Persist, Context API, and MobX.

• Built reusable UI component systems to improve development speed and maintainability.

• Developed complex forms using Formik and Yup with custom input components.

• Integrated REST APIs with Axios and Fetch, including loading and error handling strategies.

• Added UI animations and micro-interactions using Lottie and Framer Motion.

• Optimized performance by reducing unnecessary renders and heavy UI computations.

• Collaborated closely with backend developers and designers to deliver business requirements.

PROJECT HIGHLIGHTS

Booking & Scheduling Applications

• Implemented availability systems based on weekdays and business working hours.

• Disabled unavailable time slots using blocked date and time ranges.

• Synced scheduling rules with global Redux state.

E-commerce & Order Management Apps

• Built product listing, cart, and checkout UI flows.

• Integrated REST APIs for product, order, and user data.

• Implemented form validation and error handling for checkout processes.

Clinic & Service Management Systems

• Developed dashboards for managing appointments and customer records.

• Implemented role-based UI flows for staff and administrators.

• Built reusable UI components for data-heavy screens.

Admin Dashboards

• Built data tables, filters, and management forms.

• Integrated API-driven CRUD operations.

• Focused on responsive layouts and usability across devices.

LANGUAGES

Georgian — Native | English — Professional Working Proficiency | Russian — Professional Working Proficiency

EDUCATION

Ilia State University — Bachelor’s Degree in Business & Technology

Level One Frontend Development Course
